INVESTMENT YEAR: 2013

REALISATION YEAR: 2017

SECTOR: Technology

Construction software provider

Eque2 (formerly Sage Construction) provides construction related Enterprise Resource Planning software. The software caters for businesses of all sizes, across construction, house building, and onshore and offshore services, allowing builders, contractors, architects, engineers and planners to accurately manage cost and processes during a construction project.

We invested in Eque2 to support the business as it further developed its range of construction specific products, in particular their Small Medium Business ('SMB') focused software which saw significant growth during the investment period.

As Sage Construction, we have been successfully trading even during these challenging economic times. However, while Sage has a generic focus across industries, Sage Construction specifically targeted the construction and contracting vertical. This MBO represents a fantastic opportunity for us to offer even more focus to the industry, and we are delighted to have completed the transaction.

Wes Simmons
CEO, Eque2

We have achieved significant growth over the last four years, and have been able to considerably develop our range of products on offer. We're very proud of what we have achieved with Livingbridge during the investment period.

Richard Beaton

The right tools for growth

Tech Enablement

We supported the development of construction specific products, in particular their Small Medium Business ('SMB') focused software.
