Everlight Radiology, a world-leading teleradiology group

Everlight supports hospitals, clinics and radiology providers worldwide by providing a vital lifeline of after-hours urgent and sub-specialty routine reporting services. The firm currently services over 250 client sites across Australia, U.K., New Zealand and the Republic of Ireland via its global network of c.500 radiologists – all empowered by proprietary technology and supported by over 300 staff.

Founded in 2006, Everlight has developed the world's largest offshore credentialed 'ready to report' network, with FRANZCR and GMC radiologists operating across five continents. This network, combined with Everlight's leading technology infrastructure, provides clients and their patients with immediate access to qualified Consultant Radiologists 24 hours a day, 365 days a year.

“We are privileged to have been chosen to support Everlight in its next phase of growth. Everlight is a special business which saves lives daily. We are excited by the prospect of working with such a talented team to deliver high-quality, mission critical services on a global basis.”

Oliver Mauldrige

“For the better part of a decade, my clinical and executive team have worked together unified by a mission to enable better patient care. In that time, teleradiology has become central to public healthcare and Everlight has become a vital lifeline of urgent radiology reporting. Livingbridge recognises the importance of this mission, the uniqueness of Everlight, and the opportunities to provide even greater patient access globally in the future. We are pleased to be working with and investing alongside the team.”
